SYLLABUS FOR STATISTICS C183/C283 - LECTURE 1
STATISTICAL MODELS IN FINANCE
SPRING QUARTER 2020

Instructor: Nicolas Christou
Office: 8931 Math Sciences Bldg.
Telephone: (310) 206-4420
e-mail: nchristo@stat.ucla.edu
Course website: http://www.stat.ucla.edu/~nchristo/statistics_c183_c283/
Office hours: MWF 15:00-17:00 and TR 12:00 - 14:00 on Zoom

RStudio, can be downloaded freely from https://www.rstudio.com.

COURSE PREREQUISITES:
Statistics 100B.

OUTLINE

In this course students will be exposed to several statistical techniques used in investment theory and get hands on experience by applying the various models on real stock market data. The course consists of two major parts.

Part I:
This part of the course will be devoted to portfolio management. The topics are listed below:
  a. Combining individual stocks into portfolios (risk and expected return of a portfolio).
  b. Maximizing return given risk, or minimizing risk given return.
  c. Properties of the minimum variance set (efficient frontier).
  d. The single index model (with and without short sales allowed).
  e. Constant correlation model (with and without short sales allowed).
  f. Multigroup and multi-index models (short sales allowed).
  g. Machine learning and portfolio optimization.

Part II:
This part of the course will discuss topics pertaining to options pricing and investment strategies. These topics include:
  a. Pricing of complex securities such as European and American options.
  b. Investing strategies using options.
  c. Binomial model.
  d. Weiner and Markov processes.
  e. Ito’s lemma.
  f. Log-normal property of stock prices.
  g. Black-Scholes model.
  h. “The Greeks”.
  i. Implied volatility, simulations.
  j. Value at Risk (VaR).
COURSE POLICIES:

Zoom etiquette:
- Be on time and prepared with your device charged. Make sure all tech works 5-10 minutes before the meeting.
- Mute yourself right away to eliminate background noise.
- Use the chat function only when needed so the instructor can respond to questions promptly.

From UCLA Office of Information Technology:
- Students in a class and/or meeting participants and any student-hosted meetings are prohibited from recording of any kind.
- Video or audio recording (including taping, recording, photographing, screen capture and other methods of capture) for purposes other than instruction is prohibited absent a strong rationale and only if the host provides advance notice and opportunity to opt out of video/audio participation.
- During video conferencing, there is a chat function that permits participants to ask questions and engage in dialogue as the class or meeting proceeds. Recording, including photographing, screen capture, or other copying methods of chat exchanges is prohibited except by the instructor or meeting chair when advance notice is provided.

ACADEMIC INTEGRITY:
As a student and member of the University community, you are here to get an education and are, therefore, expected to demonstrate integrity in your academic endeavors. All students must uphold University of California Standards of Student Conduct as administered by the Office of the Dean of Students. Students are subject to disciplinary action for several types of misconduct, including but not limited to: cheating, multiple submissions, plagiarism, prohibited collaboration, facilitating academic dishonesty, or knowingly furnishing false information. You may have assignments or projects in which you work with a partner or with a group. For example, you are welcome, and even encouraged, to work with others to solve homework problems. Even though you are working together, the assignment you submit for a grade must be in your own words, unless you receive specific instructions to the contrary. For more information about academic integrity, please go to http://www.deanofstudents.ucla.edu/.

COURSE GRADES:
There will be a midterm exam, a final exam, a final project, and homework or labs that will be assigned every week. All assignments must be uploaded on CCLE by the due date/time for grading (https://ccle.ucla.edu). Late homework or labs will not be accepted and make-up exams will not be given. Being an active participant is important for your understanding of the material and therefore for your success in the course. The tentative dates for the exams are shown below.

Project:
For the project, students will select 30 stocks from 5 industries. Using the models discussed in class, students will construct efficient portfolios and analyze their performance over time. This on-going project will be discussed regularly with the instructor on its progress. You will have $1,000,000 to invest in these 30 stocks. The project is required and it is due anytime during week 7 of the quarter, 11-15 May.

The course grade will be based on the calculation:

\[
\text{Final score} = 0.10 \times \text{Homework/Labs} + 0.10 \times \text{Project} + 0.10 \times \text{Quiz} + 0.30 \times \text{Midterm} + 0.40 \times \text{Final}
\]

COMMUNICATION:
Please keep a current e-mail address with my.UCLA.edu in order to receive class announcements and reminders.

IMPORTANT DATES:
First day of classes: 30 March.
Last day of classes: 05 June.
Holidays: Monday, 25 May (Memorial Day).

EXAMS:
Quiz: Week 4.
Midterm: Tuesday, 19 May, 18:00 - 20:00.
Final Exam: Saturday, 06 June, 18:30 - 21:30.

Good Luck !!!
