1.   We ask a lot of questions. Why? ☺

2.   Statistics is the science of drawing conclusions from data to answer questions.

3.   What are data? (that's a good question…)

4.   Stat 10 Survey
      (copies can be found at http://web.stat.ucla.edu/~vlew/stat10/handouts.html)

5.   Categorical vs. Quantitative (Discrete & Continuous) Variables (but also Ordinal Variables)

6.   What can go wrong? (see page 11 of your text)
