

## Last Minute Information for Exam 2

TYPOS 2a.  $.61 \pm .024$  is the correct final answer not .012

3A should complete it to get the chance so the area under  $Z = .59$  is .7224 and the area  $Z$  for  $-1.18$  is .1190 so the chance is  $.7224 - .1190 = .6034$  (final answer)

Omit 5/6 from the review questions

Omit 10B from the review questions, it's actually a Chapter 6 question
