How to Access Moodle

Everything you need for this class (except for the book, professor and myself) is on the Moodle course system.

http://moodle.stat.ucla.edu

It is safe to say that one cannot pass this class without using Moodle so let’s make sure you know how to use it.

Finding your Moodle ID

You will be using a five digit number (#####) as your username. There are two ways to get this number:

• Go to the lab and at the MacOS X login screen, enter guest as the username and guest as the password. Once you are logged in, follow the on-screen instructions.

• From home, browse to http://moodle.stat.ucla.edu. The screen on the next page appears.

Find the box labeled Welcome to Summer 2008 and click on the link labeled Account Lookup page. The following screen will appear:

Enter your Student ID

UCID

Submit

Enter your UID and hit the Submit button. The following screen appears:

Your Moodle ID number will be shown in bold. Your password is your UID. DON’T FORGET THIS NUMBER!
Logging on Moodle

Browse to the Moodle homepage at http://moodle.stat.ucla.edu. It looks like:
Look along the right side of the page and find the box labeled **Login**. It looks like:

![Login](image)

Type in your Moodle ID and password and hit **Login**. If your login was successful, you will see your Moodle home screen, which looks similar to the following:

![Moodle Home Screen](image)

Click on the big blue link for our class. It is labeled **Statistics 10, Lecture 1 – Introduction to Statistical Reasoning**.

Congratulations! You are now at the course Moodle site! We will learn more about our Moodle site during our first lab section.
The Moodle page for our class looks similar to the following...

**Having Trouble Logging In? System Not Finding You?**

If you are not yet enrolled, Moodle will not be able to create a Moodle ID for you. Please enroll ASAP.

If you are having trouble logging in and you are enrolled in the class, please email support@stat.ucla.edu. Make sure to include your name, UID, lecture and section so they can fix the problem. *PleaseCc me on any emails you send to our support staff.*
